# A BEAUTIFUL USE OF SPACE

At Ideal Standard, we believe bathrooms should be living places not just functional spaces.

For us, they're far more than just places to brush your teeth.

They should be places to relax, to make yourself beautiful, to refresh and re-energise.

So, for the past 100 years we have been designing products to help you create your ideal bathroom.

Whether that is a place to escape, a boudoir, a playroom or a sanctuary, it is always a beautiful use of space.

# LOVE GETTING CAUGHT IN THE RAIN

After a busy day, your bathroom can be a refuge of relaxation and warmth. An Idealrain shower invites you to stand beneath warming rain, eyes closed, face turned upwards, and let the sensation of rainfall wash away the stresses of the day.

Idealrain helps you relax, unwind and escape. You can indulge yourself in a rain shower that you control to suit your mood. A long, hot shower gives you a deeply relaxing soaking. Lighter rainfall can revive the spirits, whilst a stronger stream gives you the feeling of reaching deep into your tired muscles and massaging them gently back to life.

## RELAXATION. OR REINVIGORATION?

First thing in the morning, an Idealrain shower can become your wake up call; transforming your bathroom into a place of invigoration. Idealrain inspires and re-energises you. It puts you in the right frame of mind to make the most of the busy day ahead, so you can step out of the refreshing rain and into your world.

Whether you want to update your existing shower – or need a whole new system for a new bathroom – you'll find Idealrain has ideas that work.

# PURE RELAXATION. PURE PLEASURE.

Idealrain lets you shower in the way that suits your mood. So you decide whether to stand in a hot, relaxing downpour, be refreshed by a fine, tropical mist or experience a full, monsoon massage. Different shower settings can be determined with a single touch of the ergonomically-designed, spray pattern selector. You choose whether to feel refreshed and ready to start your morning, or completely relaxed at the end of a day.

Idealrain Cube

### Maximise your enjoyment

Every aspect of the Idealrain collection has been created to make showering a true pleasure; from the large shower heads with edge-to-edge spray nozzles that envelope you in a warm, soaking downpour – to easy-to-use controls. High and low pressure compatibility helps maintain the right rate of water flow, wherever you are.

### Stylish design, to suit your taste

Idealrain has been designed with modern contours and sleek profiles, with handsprays that are amongst the slimmest available. They're light in your hand and feature one-touch spray pattern selectors, so they're intuitive to use.

product design award

2013

There are two shapes to choose from to reflect your personal taste. Whether you prefer the softer curves of Idealrain Classic or the more geometric, linear style of Idealrain Cube, the entire range has been designed with flat hand sprays and slender housings to create a sleek look.

If you need a more robust system for a commercial application, Idealrain Pro has been built with extra durability in mind. Whichever Idealrain system you choose, you can be assured that it has been designed to fit with any bathroom solution.

### Save water and money

Idealrain is stylish on the outside, clever on the inside. Our built-in flow restrictors cut water consumption, giving you the peace of mind that you're saving water, energy and money – without compromising your showering experience.

# WIDE SPRAY COVERAGE

Idealrain features large shower heads, convex faceplates, 10 degree angles and nozzles right to the edge of the spray plate. This ensures a wide rain effect, soaking you more thoroughly for greater showering pleasure.

**Quality, by design**

Idealrain's designers had a simple objective: To make showering the most pleasant experience it could be. The result is a collection that provides the highest level of comfort, performance, safety and usability.

Idealrain has streamlined, flat shower heads, available in a variety of sizes.

The elegant 10 degree head angle also serves to widen the spray pattern, adding to the sensation of being completely enveloped by warming water.

At just 36 mm, the handspray has one of the slimmest profiles available, for light easy usability. The face plate has no joins or overhangs, so its slick surface can be cleaned quickly and easily – helping it look good for longer.

**Rain, fine rain or massage**

The spray pattern selector is ergonomically designed to switch between modes with a single touch. And every part of every system is guaranteed for durability, by Ideal Standard.

Maximum downpour, from an ultra slim, three-function shower head.

1 Rain: relaxing downpour

2 Fine Rain: intense deluge

3 Massage: stimulating stream

SAVE  
WATER.  
SAVE  
ENERGY.  
SAVE  
MONEY.

REDUCE YOUR  
WATER BILL BY 57%  
AND SAVE UP TO  
£633 A YEAR!

Water is one of our most precious resources. Idealrain is cleverly designed and precision manufactured to help you reduce water consumption without compromising on comfort, enjoyment or reliability.

**Intelligent water flow**

Idealrain's precision-designed flow engine delivers optimal spray performance. The additional, easily fitted and removed flow restrictor, reduces water consumption in high-pressure systems from 18.5 l to just 8 l with no loss of flow.

**Good for you, good for the planet**

Saving water and energy is an important consideration when choosing a new shower. Cutting your consumption of resources doesn't just help the planet; it also saves you money.

# TECHNOLOGY YOU CAN TRUST

5  
year  
Guarantee

OUR 100 YEARS OF EXPERIENCE GIVES US COMPLETE CONFIDENCE IN THE QUALITY AND RELIABILITY OF ALL IDEAL STANDARD PRODUCTS. OUR SHOWERS HAVE LONG GUARANTEES FOR YOUR LASTING PEACE OF MIND. OUR SHOWER VALVES, FOR EXAMPLE, ARE GUARANTEED FOR FIVE YEARS.

Idealrain's designers had a simple brief: to make showering the most pleasant experience it can be. The result is a collection that provides the highest level of comfort, performance, safety and usability. From easy-to-clean surfaces and water-saving technologies to innovative touches you'll appreciate every time you take a shower.

1. Ultra strong connections  
Idealrain hand sprays have tried and tested connection resistance. So, on a fixed bracket, they can support weights of up to 20 kg.
2. Reduced water consumption  
Without loss of flow, our easy-to-fit flow restrictors cut water consumption from a typical 18.5 litres/min to just 8.1 litres/min.
3. Cool body technology  
This innovative technology prevents the handspray body from becoming hot; protecting all the family.
4. Three function spray pattern selector  
Change the spray setting with a single touch; from rain to fine rain, or massage.
5. High performance flow engine  
All Ideal rain hand sprays deliver optimal spray performance at high or low pressure, thanks to their advanced technology.
6. Easy cleaning, long lasting  
High quality silicone nozzles remain flexible for durability. Smooth surfaces, with no joins or overhangs, make cleaning easy.

**The complete Cube**  
Idealrain's Cube, all-in-one shower systems give you the choice of switching between an overhead deluge, or a hand held downpour. You are in control. Sliders rise and fall in a clean line, at the touch of a button.

Installation is straightforward.

## PRODUCT OPTIONS

## IDEALRAIN PRO

# THE ROBUST CHOICE

We've designed and built Idealrain Pro to be ultra durable, and extremely economical in use. Perfect for professional settings; like hotels, public washrooms, civic amenities, airports...

The handspray's slim lines contrast with its strength and reliability. The elegant wall mountings are actually heavy duty fixings. The shower's performance is outstanding and its looks are long lasting.

## IDEALRAIN PRO FEATURES

- |   |  |   |  |   |  |   |  |
|---|--|---|--|---|--|---|--|
| 1 | High strength, metal brackets for ultra stable wall fixing                       | 3 | Choice of single or triple function, anti-scale shower heads. Available in two sizes | 5 | Heavy duty ratchet mechanism                           | 7 | Smooth, wipe clean, flexible shower hose                             |
| 2 | Specially reinforced metal sliding rail. Available in two sizes: 60 cm and 90 cm | 4 | Extremely hygienic. Single function handsets include anti-aerosol function           | 6 | Durable metal handset. Sure grip for easy hand control | 8 | Integrated flow restrictor reduces water consumption and saves money |

## OUR STRENGTHS

### DURABILITY. DESIGNED IN

The demands imposed on commercial bathrooms are completely different to those placed on home bathrooms.

So, at Ideal Standard, we brought the full weight of our 100 years of experience to bear when we designed our Idealrain Pro collection. It will survive the impact of a high traffic environment. It will shrug off the rigours of a commercial cleaning regime. It will perform reliably and economically, year after year, guest after guest.

This shower head, for example, is uncompromisingly stylish, yet built for long term durability.

### BUILT TO ENDURE

Engineering excellence is a major part of our design strategy.

Our 90 cm Pro sliding bars are doubly reinforced with an outer tube and an inner rail, to resist distortion and perform smoothly, year after year.

Similarly, our wall mounting brackets are solid metal. They're easy to adjust. They're elegant. But they're built to handle many times the weight placed on them during normal operation.

### REAL-WORLD APPLICATION

Components that perform faultlessly are inevitably subjected to less stress. So our emphasis may be on strength, but functionality is a priority too.

Idealrain Pro handspray sliders are a case in point. They glide on their rails, without hesitation. Their controls are easily operated; locking and unlocking in one simple, slick action. And they're built from high quality metal to ensure they cannot be over tightened.

Lock. Unlock. Lock. Many thousands of operations later, they still hold the handspray in exactly the right position.

### TESTED TO DESTRUCTION. SURVIVED

Intensive and continuous testing is the key to class-leading durability. Our tests simulate extreme, real world conditions. Then go a step beyond.

Shower components are subjected to high pressure steam, to mimic the harshest of cleaning regimes. They're also sprayed with corrosive salt to test their finishes even further.

Sliding rails are distortion tested to a full 75 N. So they can withstand a weight of up to 75 kg.

Idealrain Pro was designed, built and tested to withstand difficult and stressful applications better than any other Idealrain range. So its reputation for robustness in commercial environments will always remain intact.
